### **DETAILED ACTION**

Claims 5-10, 12 and 13 are under consideration in this application.

Claims 1-4, 11 and 14 are held withdrawn from consideration as being drawn to nonelected subject matter.

#### *Election/Restriction*

Applicant's election with traverse of Group I and example 5 in Paper No. 7, filed December 6, 2001 is acknowledged. The traversal is on the grounds that the inventions are not patentably distinct. This is not found persuasive for the reasons clearly set forth in Paper no. 5. Applicants' own claims demonstrate that the inventions are patentably distinct because the claims differ in scope. The compounds in Group I are well known in the prior art. Further, applicants' own proviso clause destroys any unity of invention.

The restriction requirement is deemed sound and proper and is hereby maintained.

The application has been examined with regard to the elected compound wherein R<sub>3</sub>, R<sub>6</sub> and R<sub>7</sub> represent non-heterocyclic groups, exclusively. The additional heterocycles pertain to nonelected subject matter. It is suggested that the nonelected compounds be deleted.

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any

Art Unit: 1625

person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5-7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The expressions "substituted" and "protective group" in claims 5-7 are employed with considerable abandon throughout the claims with no indication given as to what the substituents and protective groups really are.

One should be able, from a reading of the claims, determine what that claim does or does not encompass.

Why? Because that claim precludes others from making, using, or selling that compound for 20 years. Therefore, one must know what compound is being claimed.

The written description is considered inadequate here in the specification. Conception of the intended substituents and protective groups should not be the role of the reader. Applicant should, in return for a 20 year monopoly, be disclosing to the public that which they know as an actual demonstrated fact. The disclosure should not be merely an invitation to experiment. This is a 35 USC 112, first and second paragraph. If you (the public) find that it works, I claim it, is not a proper basis of patentability. In re Kirk, 153 USPQ 48, at page 53.

The claims measure the invention. United Carbon Co. V. Binney & Smith Co., 55 USPQ 381 at 384, col. 1, end of 1st paragraph, Supreme Court of the United States (1942).

Art Unit: 1625

The U.S. Court of Claims held to this standard in *Lockheed Aircraft Corp. v. United States*, 193 USPQ 449, "Claims measure invention and resolution of invention must be based on what is claimed".

The C.C.P.A. in 1978 held "that invention is the subject matter defined by the claims submitted by the applicant. We have consistently held that no applicant should have limitations of the specification read into a claim where no express statement of the limitation is included in the claim": In re Priest, 199 USPQ 11, at 15.

#### ***Allowable Subject Matter***

Claims 9, 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if rewritten directed solely to the elected compounds.

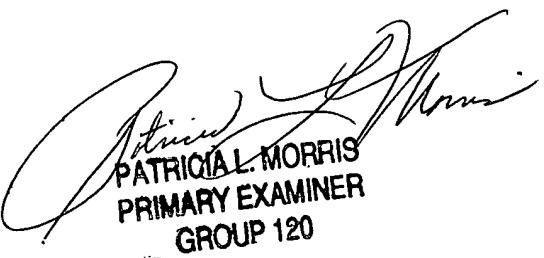

Claim 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action and limiting the claim to the subject matter indicated as being examinable, supra.

Art Unit: 1625

Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action and to include all of the limitations of the base claim and any intervening claims and rewritten directed solely to the elected compounds
